Priority number(s):

Abstract of JP6204570

PURPOSE: To manufacture a small-sized luminous display with a good yield by inserting a light-emitting element into a cylindrical case and then by filling transparent thermosetting synthetic resin into the case and hardening it.
CONSTITUTION: A flange section 8 is formed around the end of a cylindrical case 2 integrally with the case 2. Then, a tape 7 is attached to the flange section 8. After that, liquid synthetic resin 6 is filled into the cylindrical case 6. After hardening the synthetic resin 6, the flange section 8 is removed.
